

1. NHDA Endowment Fees (February 2010)

The current schedule of Archive Endowment Fees charged by the NHDA is listed in the table below. The NHDA may review the individual fees and the fee structure at any time.

Data Category	NHDA Endowment Fee
Relinquished Licence	£1000 per Licence archived Plus per well and per seismic survey fees as appropriate (see below for details)
Field	£5000 per Field archived (but may be varied up or down depending on data volumes) Plus per well and per seismic survey fees as appropriate (see below for details)
Seismic survey or geophysical survey	£500 per survey archived £150 per 3590 tape and £200 per 3592 tape submitted directly to the NHDA (field and pre-stack data) Contact CDA for the cost of loading/archiving post-stack and ancillary data via the CDA Seismic DataStore
Well	£250 per well archived (well data completed in the CDA Well DataStore) or £750 per well archived (well data supplied directly to the NHDA)
Well cores and samples	The fee depends on the volume and type of material being archived, and is subject to negotiation between the Licensee and the NHDA
Site-survey data	No charge

These fees are one-off payments made by the Licence Operator during Phase 5 of the Archive Process. There are no further ongoing fees or charges for the Licence Data once archived. VAT at the current rate is applicable to all fees.

2. NHDA Access Fees (February 2010)

The current schedule of Access Fees charged by the NHDA for third-parties to access NHDA data is listed below. NHDA may review the individual fees and the fee structure at any time.

Data Category	NHDA Access Fee
Licence data: all reports and maps	£100 per Licence, plus per well and per survey charges
Field data: all reports and maps	£500 per Field, plus per well and per survey charges
Field data: all models and production data	£500 per Field
Seismic data: field and pre-stack	Cost of reproduction and shipping
Seismic data : post-stack	The data are available to the public and CDA Seismic DataStore members from the CDA Seismic DataStore. The fee charged by the DataStore depends on the volume of data and delivery method/media. There is no NHDA access charge
Well data: reports and logs	£100 per well if provided to the public by the NHDA. The data are also available to CDA Well DataStore members from the CDA Well DataStore. There is no NHDA access charge
Well data: cores and samples	There is a day visitor fee of £120 for visits to BGS core stores. Samples cost £10 each, or £14 if the sample is taken by core store staff
Geological and geophysical site-survey data from BGS (the MEDIN DAC)	£100 per survey, plus any reproduction and shipping costs. Other DACS have their own access charges

The fees are waived on all categories of data for academic use (except for post-stack seismic data delivered from the CDA Seismic DataStore), providing that a waiver form is submitted to BGS with the enquiry. Reproduction and shipping will be charged at cost plus 15%.

VAT at the current rate is applicable to all NHDA fees.
